

Thanks for the interest in the lab.

We are not in a position to take on any high school interns at present. This holds for both in-person and remote internships or mentorships.

In the past there have been Univ-sponsored programs for high school students, but I don't believe these have operated for the past few years. You would have to poke about the Univ webpage to find if any are operating.

Because of the high demand for research internships from UC Berkeley students and restrictions about sponsoring minors on campus, we only take on high school students through official UC-sponsored programs

Best wishes,  
Rich
